

DESCRIPTION

Designed to provide outstanding performance in the cleaning of vertical and difficult-to-access surfaces, the SEKO Foam Cannon is perfect for use in food and beverage production areas where impeccable hygiene standards are essential.

This pressurized mobile system produces a rich and thick premixed foam that provides comprehensive coverage of surfaces along with extended contact time for superior cleaning and disinfection performance.

Manufactured from food-grade materials, the fully-mobile foam cannon requires only a compressed air supply for operation and is very simple to maintain, making it one of the most convenient surface-cleaning solutions of its kind.

TECHNICAL CHARACTERISTICS

- Equipped with a lance and dosing tube
- Available as a 24 or 50-litre model
- No electrical connection required
- Available in stainless steel and painted versions
